Subject: Met data
Attachments: peoria_07.dat; peoria_09.dat; peoria_10.dat; peoria_11.dat

Hi Sarah,

Here's the remainder of the met data for the Greater Peoria Municipal Airport (Station Number 14842). Yesterday, I sent 2008. Attached to this email are 2007, 2009, 2010, and 2011.

The files format is

Year	Month	Day	Hour	Wind Speed (m/s)	Wind Direction (direction wind is blowing from)
------	-------	-----	------	------------------	---

Don't pay attention to the date listed in the heading of the files (9/18/2006) . That's the date the station converted to sonic anemometers and is needed to process the data.

Again, this is data that is generated by averaging the rolling, 2-minute average wind data collected at station 14842. It's a better representation of the hourly winds than taking a single observation at 10 minutes before the hour to represent the preceding hour.

Let me know if you have any questions.

Randy
